# Bug Tracker Application Walkthrough

Samarth Rai (b00082764) & Ahmed Saad (b00086170)

This application is used for tracking bugs during software development.
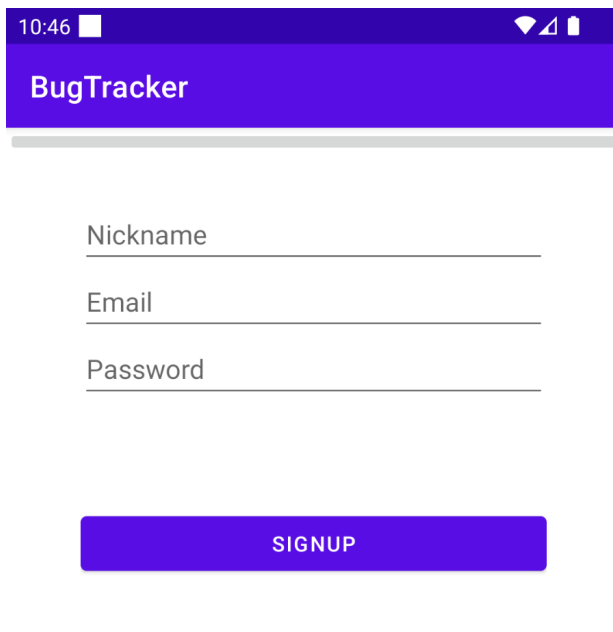

To begin with, the login page is displayed below.
Prior to first use, you should enter your credentials and sign up using the sign up button.

Enter your nickname, email address and password to sign up.
Note: The name you provide here will be mentioned in the app when you raise a new bug.

Once you receive the signup successful toast message, click the login button which will take you to the main page.
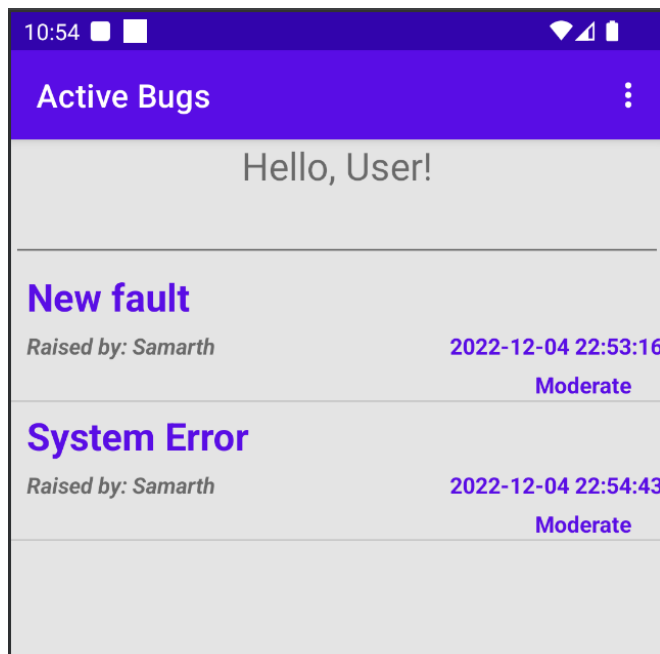

In case you forget your password, type in your email address and click on Forgot password. An email will be sent to yout with instructions on how to change your password. After changing your password, you can continue with this user guide.

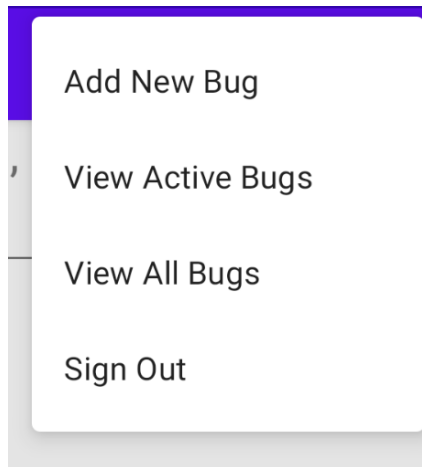

Enter your email address and password to log in to the application.

The main page is where all the Active bugs are displayed. All bugs with the status of "Open" meaning that they are still not resolved, are displayed on this page.

Tapping on the menu will give you four options as shown below:

Tap on Add New Bug to add your first bug to the application:

Enter the Bug title, a description describing the bug, its priority and its Status.

Title: The issue that you are facing, summarized in a few words
Description: In the description, you can explain in detail the description of the bug that you found and can add in more information as you wish.
**Priority**: The priority slider is used to a lot the priority to the bug that is reported there are 5 levels - Low, Moderate, Major, High and Critical.
Status: This is used to denote if the bug is still open or it has been resolved.
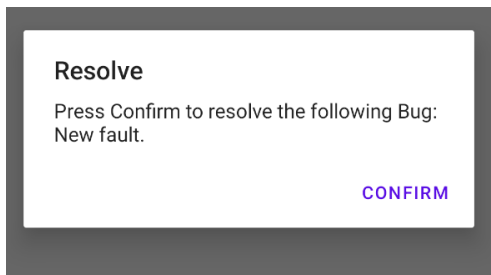

Clicking on adding bug will take you back to the Main page with the updated bugs list.

From here, you can click on any bug to open its detailed page:
This page shows the bug information in detail along with its description, and priority, the time when it was raised.
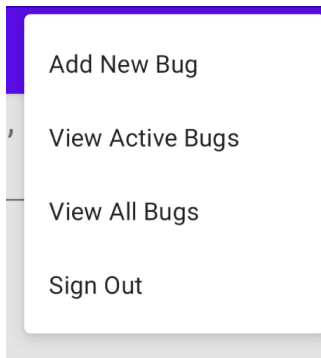

There is also a button on this page to mark the bug as resolved. Clicking on this button will take you to an alert to confirm your action.

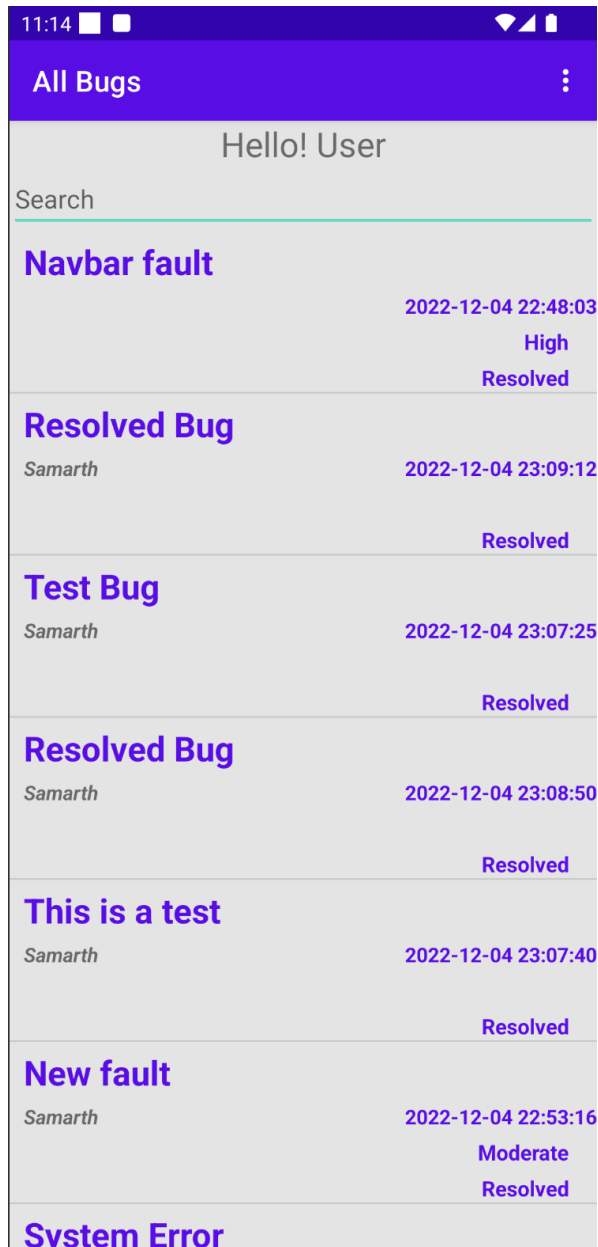

Clicking on confirm will mark this bug as resolved and when you click confirm you are take back to the main page and the bug you marks will not be shown in the screen.

Now, from the menu click, you can click on View All Bugs:

This All bugs page shows all the bugs that were ever entered to the application, regardless of of their status begin open or Resolved.
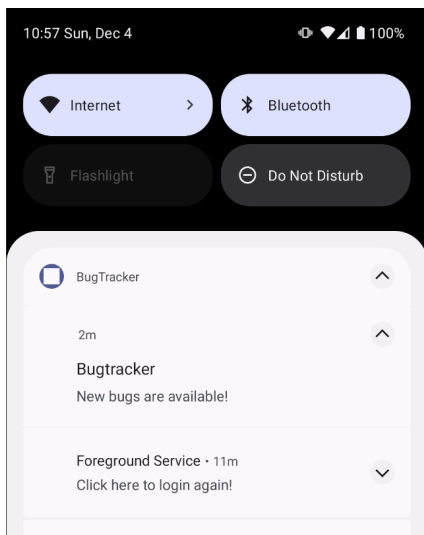

You can tap the back button on your phone to go back to the page with Active Bugs or you can go to the Active Bugs page using the menu.

Both the Active Bugs and All Bugs pages have a search bar that you can use to search for any term that is contained in the title or the description of the bug and appropriate search results are shown.

The following notifications are sent via the application. Tapping on either notification takes you to the login screen of the application.
